Customer Journey Map

Date	03 October 2026
Team ID	SWTID-2026-5957
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions *What does the customer do?*	• Open the Incident form. • Enter issue details and select relevant fields. • Check the form before submission.	• Change Incident field values. • Observe dynamic field behavior. • Complete required information.	• Review the completed Incident. • Submit or update the record. • Confirm the expected result.
Touchpoint *What part of the service do they interact with?*	• Incident form and fields. • Category, priority and description. • Client-side form controls.	• Client Scripts. • UI Policies. • Dynamic field messages and states.	• Submit/update action. • Validation or form messages. • Updated incident record.
Customer Thought *What is the customer thinking?*	• What information is required? • Which fields apply to this issue? • Can I complete the form easily?	• The form should guide me. • Irrelevant fields should be controlled. • I should know what is required.	• Has my incident been accepted? • Is the information complete? • What happens next?
Customer Feeling *What is the customer feeling?*	• Curious • Slightly unsure • Guided by the form	• Supported • Confident • Less confused	• Satisfied • Assured • Clear about next steps
Process Ownership *Who is in the lead on this?*	• Incident user / Service Desk • ServiceNow configuration owner	• ServiceNow Administrator / Developer • Application or platform owner	• Service Desk / Incident owner • Administrator for rule maintenance
Opportunities *How can we improve this stage?*	• Show only relevant fields. • Make required fields obvious. • Provide sensible defaults.	• Prefer UI Policies for simple form behavior. • Use Client Scripts for dynamic logic. • Keep conditions and scripts focused.	• Validate before submission. • Give clear user messages. • Test true/false conditions and edge cases.

Team Details	
Team leader : RIFANA FIRDOUS J	**Team member :** SIVARANJANI S
Team member : SIVASHREE S	

Project Focus: Implement Client Script & UI Policy (Incident) - client-side form behavior, conditional field control, and user guidance.
