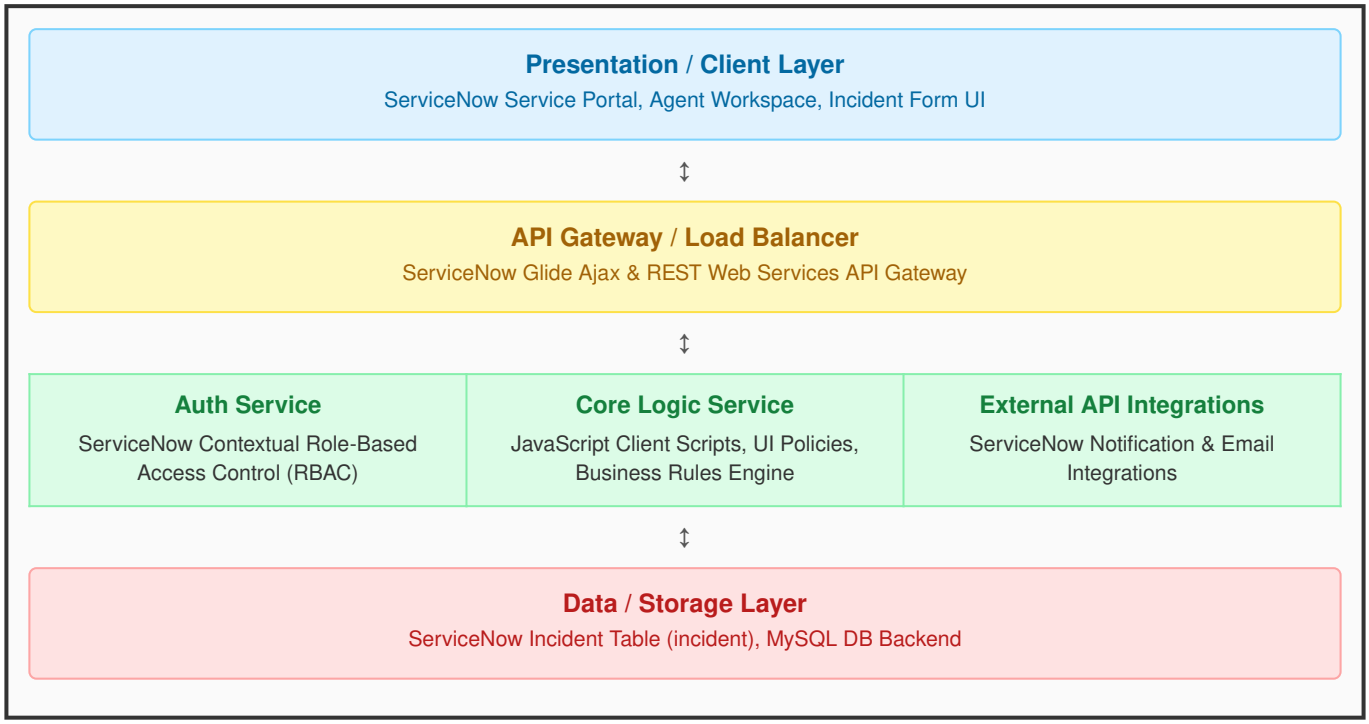
Solution Architecture

Date	03.10.2026
Team ID	SWTID-2026-5957
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.



Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
[Presentation Layer]	Provides the interactive user interface for service desk agents and IT staff to create, view, and manage incident records.	ServiceNow UI, Agent Workspace, Service Portal
[API Gateway]	Manages client-server communication, asynchronous data retrieval, and secure routing of form requests.	ServiceNow GlideAjax, REST APIs
[Microservices]	Executes client-side validation logic, conditional field state changes, and business rule evaluations.	JavaScript, Client Scripts, UI Policies
[Database]	Stores persistent incident records, user profiles, configuration items, and audit logs securely.	ServiceNow Incident (incident) Table
