Code-Layout, Readability and Reusability

Date	03.10.2026
Team ID	SWTID-2026-5957
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Maintained clean 2-space indentation
2	Proper File Structure	Files and folders are logically organized	Yes	Separated client scripts and UI policies
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Descriptive camelCase identifiers used
4	Function / Method Names	Functions are descriptively named	Yes	Clear verb-first naming convention
5	Code Comments	Inline and block comments explain logic	Yes	Detailed explanations for form validation rules
6	Modular Design	Code is split into reusable functions/modules	Yes	Reusable validation logic encapsulated
7	No Redundant Code	Duplicate or unused code is removed	Yes	Optimized script blocks and eliminated dead code
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Null checks included for form fields

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Incident Field Validator	JavaScript (ServiceNow Client API)	Incident Form Client Scripts	High
2	Dynamic Mandatory Field Setter	ServiceNow UI Policy Engine	Incident State & Priority Rules	High
3	Form Notification Handler	JavaScript	Client-side Error & Info Messages	Medium
4	Caller Info Auto-Populator	GlideAjax / JavaScript	Incident Creation & Update Views	High

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
5	Priority Matrix Evaluator	JavaScript Client Script	Incident Impact & Urgency Rules	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-structured and organized according to ServiceNow best practices.
Readability	5	Clear variable naming and consistent indentation enhance maintainability.
Reusability	4	Modular functions allow easy adaptation across similar ITIL modules.
Documentation / Comments	5	Comprehensive inline documentation and header descriptions provided.
Overall Score	**4.8 / 5**	**Excellence in code quality, adherence to standards, and robust design.**
