No. of Functional Features Included in the Solution

Date	03.10.2026
Team ID	SWTID-2026-5957
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Mandatory Field Validation UI Policy	Enforces mandatory fields dynamically on the Incident form based on user input category.	UI Policy / Form Design	Done	1.0
2	Field Visibility & Read-Only Toggle	Dynamically shows or hides specific fields (e.g., Subcategory, Resolution Notes) depending on State values.	UI Policy / Client-Side UI	Done	1.0
3	Caller Info Auto-Population Client Script	Uses GlideAjax to automatically populate caller phone number and department upon selecting a caller.	Client Script / GlideAjax	Done	1.0
4	Client-Side Date Validation Script	Validates that the proposed resolution date is not set in the past before form submission.	onSubmit Client Script	Done	1.0
5	Dynamic Priority Matrix Calculation	Automatically updates Impact and Urgency fields using client-side scripts to compute Incident Priority.	onChange Client Script	Done	1.0
6	-	-	-	-	-
7	-	-	-	-	-
8	-	-	-	-	-

Feature Summary:

Total Features Planned	5
Total Features Implemented	5
Core / Must-Have Features	5
Additional / Nice-to-Have Features	0
Features Tested & Verified	5

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features

1	User Interface (UI) / Forms	3	Mandatory Field Validation, Field Visibility toggle, Priority Matrix calculation
2	Backend / Logic (GlideAjax)	1	Caller Info Auto-Population
3	Database / Storage	0	N/A (Relies on platform Incident table schema)
4	API / Integration	0	N/A
5	Security / Validation	1	Client-Side Date Validation Script

Technology Stack & Justification:

Technology	Justification
ServiceNow Platform (JavaScript / ECMAScript 5)	Provides the core IT Service Management environment and native client-side scripting engine for executing Client Scripts and UI Policies.
GlideAjax	Enables asynchronous communication between client scripts and server-side records to fetch caller details without page reloads.
HTML5 / DOM Manipulation	Used within client scripts to dynamically manipulate form fields, styles, and field visibility based on user interactions.
